

OPC Polymers is a leading coating resin producer headquartered in Columbus, Ohio. OPC Polymers continues our long history in the paint & coatings market alongside our new partners, Multiquímica Dominicana as OPC Polymers. This new partnership results in a stronger resin supplier for the paint and coatings market by enhancing the solvent-based resin product portfolio and the addition of water-based resin technology from Multiquímica.

## Capability to support your Value Chain

### 75 years of resin experience with a global reach

With an emphasis on North America, OPC Polymers has supplied paint companies for more than 75 years.

### Alkyd and Water-Based Resins for Paints & Coatings

We offer a vast product line of alkyds, latex polymers, dispersions, adhesives and thickeners for the coatings, market.

### Transloading & Repackaging

OPC Polymers has an appreciable rail car siding with capabilities to repackage bulk from rail to tank wagons and drums.

### Product Development & Technology Innovation

OPC Polymers will continue to develop new resins that meet our customers ever changing performance requirements and regulatory demands.

### Toll Resin Manufacturing

If you have a proprietary resin and are looking for someone to produce it on your behalf, give OPC Polymers a call; we have decades of experience in outsource manufacturing.

### Dependability

Our long history and outstanding customer service are second to none- OPC Polymers is a name you can trust during the most challenging times.

### Distribution
